

## **Olivian SAVIN**

*Executive Director – Future Energy Leaders Romania*

Olivian Savin is the Executive Director of Future Energy Leaders (FEL) Romania since 2024, part of the World Energy Council.

Olivian holds a PhD in energy engineering, graduated as valedictorian of the hydropower engineering department of the Faculty of Power Engineering at University Politehnica of Bucharest. He did an international master's degree in English at the Institut National Polytechnique de Grenoble in France, then worked at the largest energy producer in Europe, Electricité de France (EDF), where he finished a 3-year industrial PhD thesis in French, creating a new method to estimate the costs and reliability of the power plants equipment, completing his education in 3 different languages.

With a keen understanding of the evolving energy landscape and the intricate web of the industry, Olivian is working now as a Technical Manager at Nano Energies Romania paving the road of aggregation and ancillary services in the private sector. Prior to this, he was senior regulatory specialist, energy advisor and board member for energy startups.

Olivian's impact was also recognized in 2023 in the well-known magazine Forbes 30 under 30 Romania, being one of 30 young most important figures under 30 years old in the country.

This year, Olivian was elected to be part of Global FEL - WEC, most promising young leaders network in energy all around the world and was appointed as Young Energy Ambassador 2025 alongside approximately 30 people from all Europe at European Commission, representing Romania this year.
